

BCP TECHNICAL SERVICES, INC.

BCP's New Flux Thimble Jacking Tools

- Low Cost alternative to expensive and bulky hydraulic thimble jacking tools and faster and more efficient than the manual OEM jack.

- Light weight for easy handling on the Seal Table
- Specific Tool for Retraction (12" Stroke) or Insertion (6" Stroke)
- Requires only a single air line to operate
- Mounts in Thimble jacking holes and is perfectly centered over the thimble, with no side loading

- Compact and safe to operate, using only 100 psig
- Tested and used at operating nuclear site with historical retraction/insertion difficulty, with excellent results.
