BCP Engineers & Consultants
Since 1981.
Better solutions. **Consistent** performance. **Proven** results.

CYBER SECURITY SERVICES

SERVICES

- **NRC or NOS AUDIT RECOVERY**
- **CDA DESIGN PROJECT SUPPORT**
- **SECURITY CONTROL ANALYSIS**
- **POLICY and PROCEDURE DEVELOPMENT**
- **CYBER SECURITY SPECIALIST TRAINING**

Our experience extends to all aspects of Cyber Security Program development and implementation. Our plant experienced multi-disciplined team, skilled in information security, risk management, business continuity and disaster recovery provide our clients the capability to meet any Cyber-Security program challenge. BCP maintains Cyber Security Team oversight and Project Management as required.

BENEFITS

- **FLEXIBILE PARTNERING**
  Cyber resources when and where you need us. We design our services to work with your team in the most efficient and effective manner possible.

- **REDUCED TOTAL COST**
  Extraordinarily successful with first-time through CSAT document approvals, expert knowledge in Critical Digital Asset (CDA) capability determination, eliminating unnecessary security controls and on-going monitoring, drives our ability to deliver significant cost savings.

- **ENHANCED VULNERABILITY MITIGATION**
  Correctly assessing CDA complexity, configuration and SSEP function enables us to implement the mitigation strategy efficiently and effectively.

- **RISK REDUCTION**
  Proven success in utilizing the latest NRC guidance in developing CDA cyber assessment documents which has provided significant reduction in cyber security and regulatory risk.

The Right Choice.

Our team performs Cyber Security Program improvements and solutions utilizing NEI 13-10, NEI 08-09, and EPRI TAM based Cyber Security CDA assessment tools that meet the requirements of NRC regulation 10 CFR 73.54. BCP is an Engineering, Project Management and Specialty Services consulting firm that fills the gap between Design and Operations. We provide value and trusted leadership for developing and implementing technical solutions by bringing the right people, processes, and technologies at the right time.
